## NON-STICK CAST ALUMINUM DUTCH OVENS

We love these **NEW Non-Stick Cast Aluminum Dutch Ovens** for 5 main reasons:

1. They have the look of cast-iron Dutch Ovens without the heavy weight.
2. Encapsulated disc that makes them compatible with ANY cooking surface, including induction.
3. Self-basting enamel lid design that collects droplets of condensation and allows them to drip back in the food, keeping it tender.
4. Exceptional heat conductivity, non-stick and stain-resistant double ceramic-coated interior.
5. Oven and dishwasher-safe, BPA and PFOA-free.

## MINI COPPER COLLECTION

Chic from oven to table! Designed elevate oven-to-table service, this collection of **mini copper** includes sauce pans, frying pans and saucepots. Versatile and functional they are the perfect accent piece that will make a statement. The thickness of the walls at 2.7mm along with their optional covers, bring added heat retention to the table.

## INDUCTION ADAPTER

**A must have!** Made of a triply combination of 18/10 stainless steel/aluminum/stainless

steel, this adapter will make any type of vessel induction ready - including stainless steel, aluminum, ceramic, and glass. Use it on buffets or heating stations: it will distribute heat evenly. It can even be used as a universal heat diffuser on gas or electric cooktops. Other features include a detachable stainless steel handle, and dishwasher-safe composition.

## NON-STICK PAN LINERS

Turn any of your pans into cookware with a non-stick finish! Heat-resistant up to 500°F, these silicone liners can be used with or without grease and liquids, creating a non-stick finish in pans made of stainless steel, cast iron, aluminum or carbon. They are reusable, dual-sided with non-skid base and are dishwasher safe. It stays in place while food is scrambled, tossed, and turned. A brilliant solution that creates savings in money - and most importantly for us in NYC - space!
